PRESS RELEASE

GANZ camera series with GX5-Technologie

Düsseldorf – New in GANZ camera program: The ZC-YX/NX270 CS-Mount-series with GX5 Technologie

Four different versions of ZC-YX/NX270-Serie are available. Two color cameras and two day-/nightversions, one with WDR function. The new GX5 technology brings excellent image results under the most adverse lighting conditions. Already a minimum illumination is sufficient to get the stunning color images at night. Other digital features provide a further improvement in results. This includes for example 2DNR / 3DNR. The 700 TV lines also ensure a high image quality.

PRESS RELEASE

CBC (Europe) GmbH belongs to the CBC Group, one of the largest manufacturers of video surveillance system, and can look back on 23 years of successful business in Germany. CBC is an international trading company which was founded in Tokyo, Japan, in 1925 by Mr. Utaro Doi.

Advanced video surveillance products are being continuously planned, developed and produced at our Japanese parent company in Tokyo. Numerous innovations have been successfully launched on the market, especially in the field of lens and camera technology. The lenses we have been producing for 30 years are developed and manufactured in our overseas works.
